Why choose a Caloo Skate Park:

- ▶ Manufactured from heavy duty galvanised steel
- ▶ 25 Year Guarantee
- ▶ Internally clad with plywood to help absorb wheel noise also the riding surface is coated with a specialist protective paint to help deaden sound,
- ▶ A tough, hard, durable coating used in the automotive industry to protect against stone chips, salt, damp and rust is applied,
- ▶ All of the equipment is Made in Britain.

Product Specification:

- ▶ **Steel Framework**
 - ▶ Heavy duty mild steel angle manufactured as per individual equipment's drawing requirements and galvanised to protect against corrosion
- ▶ **Steel Skating surface**
 - ▶ Heavy duty 6mm thick mild steel sheet with Skate Active textured skating surface to improve grip and reduce noise which provides smooth skating surface with anti corrosion properties
- ▶ **Steel Thickness**
 - ▶ 2mm - 6mm thickness steel is used for all steel components
- ▶ **Side cladding**
 - ▶ All outside faces are internally covered with a 9mm marine grade plywood and then covered with an outer surface of 2mm galvanised sheet to dampen noise and prevent access to underneath of ramps
- ▶ **Guard rails**
 - ▶ All guard rails are manufactured from heavy duty steel tube and 3mm galvanised sheet which is then galvanised and powder coated to customer specifications to ensure compliance to EN-14974
- ▶ **Usage Instructions**
 - ▶ A detailed user instruction label will be supplied indicating age range and suitable activities
